NIS CHAPTER IX MEMO NO. 45
(REVISION)

DATE: 13 January 1960

MEMORANDUM FOR: NIS Chapter IX Contributors

SUBJECT: Definition of "Obtainable in quantity"

1. For Chapter IX and Section 19 purposes, maps or charts stated to be "obtainable in quantity" must be in one of three categories, as follows:

- a. Maps or charts in stock ready for distribution.
- b. Maps or charts for which reproduction materials (separation plates, etc.) are on hand.
- c. Monochrome maps or charts (lithographic reproductions) that may be reproduced with accuracy and clarity.

2. The l.c. category is not to be interpreted as including monochrome maps or charts that could be reproduced only by photostat or ozalid methods.

3. A definition of "obtainable in quantity" as used in Chapters IX and Sections 19 will be published in the glossary portion of the Guide to Users for all future Chapters IX, including those now at the coordination stage. The definition as formerly stated (including only two categories) will apply until the preparation of NIS 50A.
